Dear Takeschi Abe,

The Institute for the History of Aluminium (IHA) is a french non profit organization dealing with the history and heritage of the aluminium industry with an international scope. We are publishing the Journal for the History of aluminium, with articles in French and English that offer an overview of researches in progress, cultural and scientific events, archives and artefacts collections related to aluminium.

We would be interested in publishing an article on the history of the aluminium industry in Japan. The idea is to present and analyze the turn from primary aluminium production towards aluminium recycling that occurs in Japan during the 1980s.

I make contact with you following the advices of Patrick Fridenson, who is the president of IHA scientific council. Would you know a researcher that would be able to make such a paper for our journal ?

Thank you in advance for your help, Best regards,

Claire Leymonerie
